

**Teachers, note this:** I need all the student's contact information under the drawing BUT only the student's first name and School will be shown in public.

## 2020 Earth Day Coloring Contest

Almost all of the food we eat each day depends on bees and other flying pollinators to start the food's growing process. If we didn't have pollinators, we would not have fruit, vegetables, milk or meat to eat. You may add a few details to the picture below as you color it.
