

Miscellaneous Sale Items

X-Y. Live Stakes: Live stakes are a great tool for establishing a hearty root system on an eroding streambank or slope. Each live stake should be driven into the soil about 1/2 -2/3 the length of the stem. Spacing should be 2-3 feet apart. It may take a year or two before you see leaves, but the live stake should be building roots as soon as the first growing season. For more information call our office.

I. Flags (10) - Flags are 21" long with a flag for easy spotting of your seedlings in yards and fields.

II. Fertilizer Tablets (10) - Time release tablets for trees and other plants. The formula contains nitrogen, phosphorous, potassium, and trace elements in solid form to feed plants in a wide range of soil and climate conditions. Use one tablet per seedling, transplant, and other wood cutting.

III. Tube Tree Protectors w/Stakes (10) 4" in diameter tube speeds photosynthesis and protects tree from animals, rodents and insects. Includes bamboo stakes and cable ties.

IV. Bluebird House (each) - these houses are made from cedar. The ideal location is near mixed hardwood forests or grasslands. Boxes should be mounted on posts about five feet above the ground.

V. Seeds-Moist Meadow: This native seed mix is perfect for areas that are wet for longer periods of time, making it great for areas that are too wet to mow. This colorful mix is expected to attract wildlife like pollinators and songbirds. Once established, this seed mix is expected to bloom from June to October. Each packet is one ounce and covers 100 sq ft.

VI. Seeds-Pollinator: This beautiful wildflower mix includes a wide variety of species, all of which are native to Ohio. Once established, this seed mix is expected to bloom from April to October. The wide range of colors and bloom period can help support pollinators in your community. Each packet is one ounce and covers 100 sq ft.

VII. Shiitake Mushroom kits: Enjoy fresh, delicious gourmet mushrooms year-round. Each kit comes with 200 spawn plugs, 1/4 lb. bees wax, wax dauber, and 5 metal labels with growers guide. Each kit will plug approximately ten 3" to 4" diameter logs, 40" long. It can take from 7 months to 2 years for the mushrooms to spawn. Logs (you supply) that will work include white oak, bur oak, swamp white oak, red & black oak, soft maple and hickory.

= Pollinator Value = Wildlife = Showy blooms = Edible fruit = Fall color = Deer tolerant = Salt tolerant

Soil Moisture Levels

Dry: Very well-drained soils that rarely have standing water, even after a heavy rain event.

Medium: Well-drained soils, sometimes experiences standing water, but only for short periods of time.

Moist: Usually damp soils. Can have standing water for a few days after a heavy rain event. Surface can dry out in the summer.

Wet: Soil stays soggy most of the year, even through the summer. Experiences standing water for a week in the spring or after a heavy rain event.

Growth Rate

Fast is typically a growth rate of greater than 24” in height a year.

Moderate is typically a growth rate of 13-24” in height a year.

Slow is typically a growth rate of less than 12” in height a year.

Deadline for ordering is March 29, 2024.

Seedlings are sold on a first come first serve basis, many of the seedlings are sold out before the order deadline.
